

Manufacturer of Concrete Batching, Mining, & Quarrying, Blending & Asphalt Equipment

Cement silo configured for transport

Cement silo configured for transport (rear side view)

Features:

- **Cement storage silo:**
 - » Overfill protection
 - » Folding silo hand rails
 - » Wind up ladder access to silo roof
 - » Two quick release silo inspection hatches on the roof
 - » Shedder angle mounted above silo horizontal screw
 - » Sliding shut-off plate above the horizontal screw allows the screw to be emptied for transport and maintenance with product remaining in the silo.
- **Horizontal screw** 300mm diameter transfers product to the incline screw.
- **Incline screw** 300mm diameter discharges the product.
- **Chassis** is specially designed dual axle and complies with Australian Standards ADR38.
- **Motor control centre** is lockable and attached to the chassis.
- **Wiring** is steel armoured.

- » CMQ's mobile silos are available in various cement storage capacities: 40T, 75T, 100T, 125T and 200T.
- » The plant can be towed by a standard prime mover without escort.
- » No requirement for craneage for mobilisation and demobilisation.
