

Manufacturer of Concrete Batching, Mining, & Quarrying, Blending & Asphalt Equipment

Wet mix plant on a barge

Barge being positioned offshore at Tugun, QLD Australia

CMQ is known for producing customised designs catered for specialised and challenging projects, such as the Tugun Desalination Project.

CMQ was employed to produce ready mix concrete on a barge 400 metres offshore from Tugun (Gold Coast, Queensland) enabling concrete to be pumped to the ocean bed for the outfall tunnels being constructed as part of the Tugun Project.
