

Manufacturer of Concrete Batching, Mining, & Quarrying, Blending & Asphalt Equipment

Typical belt weigher under a multi storage overhead bin

Sand on belt weigher

Aggregate on belt weigher

5-bin aggregate trailer with belt weighers

The advantages of using belts weighers:

- » Aggregates batched to a very high accuracy.
- » Allows high volume production.
- » No discharge gates.
- » Greatly reduces maintenance costs.
- » No aggregate weigh hopper to wear.
- » Minimal noise in comparison to operating an aggregate weigh hopper system.
