

Manufacturer of Concrete Batching, Mining, & Quarrying, Blending & Asphalt Equipment

600 tonnes per hour cement treated base (CTB) plant

Blending plant with 4 bins

Receiving bins with belt weighers

### Complies with Queensland Main Roads MRTS08

Production of:

- » Roller compacted concrete.
- » Stabilised road base.
- » Mixing of contaminated soils.
- » Cement treated base.
- » Land fill soil remediation.
- » Product blending.

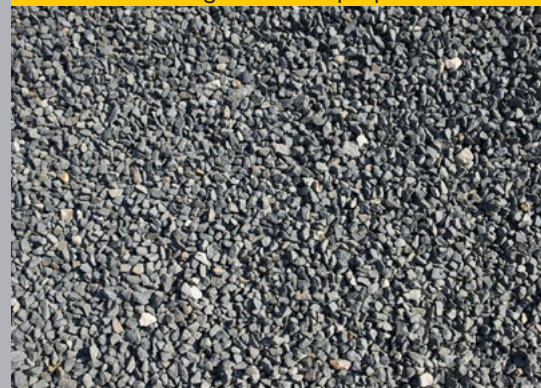

CMQ manufactures static blending plants 80 – 1000 tonnes per hour with cement or lime binders that comply with the latest Main Roads specifications for all States and Territories in Australia.

The plants feature computer controls (to customer's requirements) with belt weighers, loss of weight for cementitious material and positive displacement water and admixture pumps.

Proven accuracy to within 0.5%.

Receiving bins with spill plates

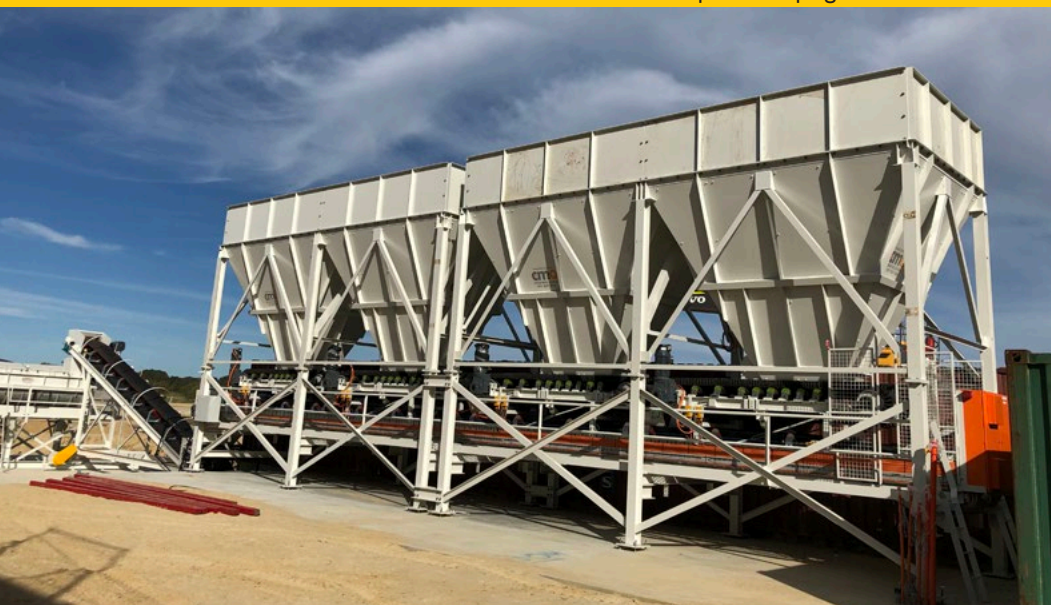

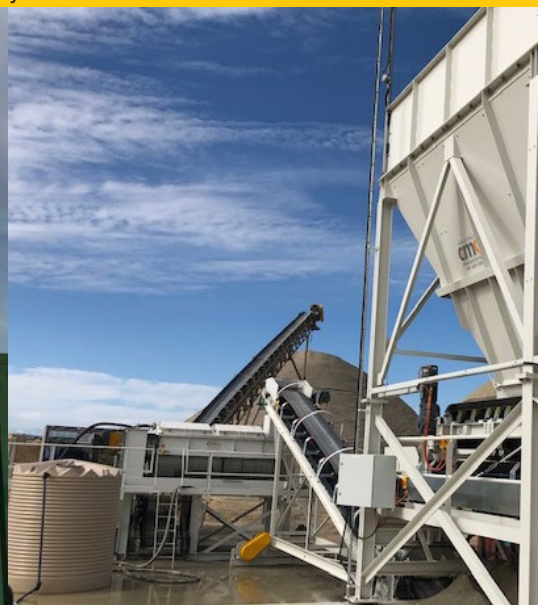

Sand blending plant with 4 belt weighers and receiving bins

CMQ 600 tonnes per hour pugmill and radial conveyor

4 Receiving bins and belt weighers
