

Auxiliary weigh hopper in working position

Features:

- » Low profile aggregate weigh hopper, 15 tonne capacity on shear beam load cells.
- » No loader ramp required.
- » Digital indicator for loader driver to view.
- » 900mm wide conveyor folds downwards for travelling.
- » Electricals – steel wire armoured cable.

Auxiliary weigh hopper configured for transport

CMQ's free-standing cement weigh hopper with fork lift tyne slots is mounted on shear beam load cells on a skid base support frame (split for transport), complete with discharge auger and digital weight indicator.
